

# Agenda

## ① Keys Recap

Primary Key  
foreign Key

## ② SQL Introduction

Create Database  
Create Tables

## ③ Insert select

## ④ foreign Key Partical

## ⑤ Sakila DB

MySQL Server

—

MySQL Workbench

—

Sakila Database

—

Super Key → Any combination of keys  
that uniquely identify  
a Row

Candidate Key - Minimum combination of keys that can uniquely identify Rows

Q Can a Table have more than 1 Candidate Key

→ YES

User  
Id      Name      Passport Number      PAN NO

Primary Key has broader Role

→ DB sorts the data by Primary Key  
→ DB creates index on Primary Key

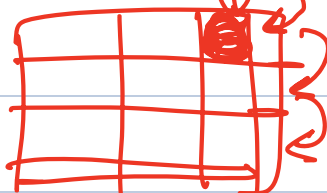

INDEX

There can only be 1 Primary Key

Index  
Page  
→  
Primary Key → Address

| 7D | Name    |   |
|----|---------|---|
| 1  | Kirku   | ↙ |
| 2  | Samikha | ↙ |
| 3  | Naman   | ↙ |
| 4  | Ashwika | ↙ |

→

Map

| Roll | Student   |
|------|-----------|
| 1    | [Address] |
| 2    |           |

## Good Primary Key

- Be fast to sort
- Should be smaller in size
- Should Not Change

2014 (125)

## Foreign Key

eg

| Student |      |     | <u>Batch</u> | Batch |      |
|---------|------|-----|--------------|-------|------|
| S-id    | Name | PSP | B-id         | bid   | Name |
| 1       |      |     | 4            | 1     |      |
| 2       |      |     |              | 2     |      |
| 3       |      |     |              | 3     |      |
| 4       |      |     |              |       |      |

5

foreign key

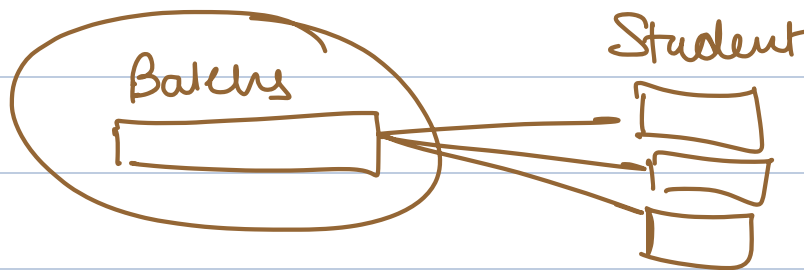

4

Apr 28

Batch

| Id | Name   | S-id            |
|----|--------|-----------------|
| 1  | Apr 28 | [3, 2, 3, 4, 5] |

| Id | Name | Sid |
|----|------|-----|
| 1  | Apr  | 1   |
| 1  | Apr  | 2   |

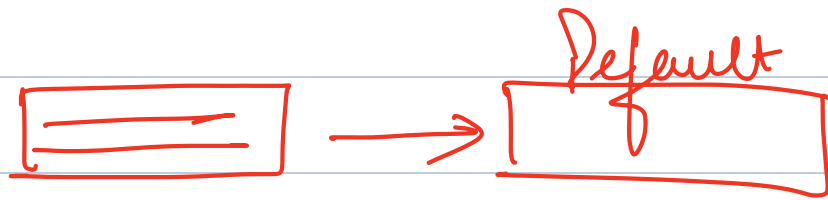

Batch gets deleted    No Action on Student  
Set NULL

~~Giff Card~~ → Amazon  
Flipkart } Deleted

CASCADE Effect

Reset → Default

SET DEFAULT

ON DELETE  
OR ON UPDATE

- CASCADE
- SET NULL
- NO ACTION
- SET DEFAULT

SQL — Structured Query language

Language to interact with Database to  
perform various action such as  
Read Write Update & DELETE
